### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest an electrode structure having at least one moveable surface that is made up of component of a higher thickness that includes a catalyst coating being applied thereto and a thin sheet of thin mesh wires being overlapped onto the component of higher thickness that contains the catalyst coating. None of the prior art of record show such an electrode structure, in fact the prior art of record shows the catalyst being applied to the thin mesh of wires that is in contact with the membrane rather than the coarse mesh. Applicants have found that by coating the catalyst on the coarse mesh component rather than on the fine mesh component, that the cell voltage is reduced, the oxygen content in the chlorine and the overall process efficiency of the cell is improved.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
